

# Requesting Insurance Not Available in Your County

## Filing a request

Producers may request insurance coverage for an insurable crop that is not available in a county by completing a Request for Actuarial Change form through a crop insurance agent.

### Available in All Counties

This opportunity to request insurance coverage is available to producers in all counties nationwide.

### Important Dates

Requests for coverage on crops without actuarial documents in a county (request type XC) must be submitted to an insurance provider on or before the sales losing/cancellation date listed in the specific crop policy.

### Crops Covered by Written Agreement

For a complete list of crops covered nationwide, see: [www.rma.usda.gov/policies/07croplist.html](http://www.rma.usda.gov/policies/07croplist.html)

### Requirements for Making a Request

A properly completed request must contain at least the following supporting documentation:

1. A completed actual production history (APH) form (only required for crops that require APH) based on verifiable records of actual yields in the county or area for which coverage is being requested for at least the most recent 3 years in the base period for the crop or a similar crop.
2. Acceptable production records for at least the most recent 3 consecutive crop years.
3. Evidence from agricultural experts that the crop can be produced in the county if the request is to provide insurance for practices, types, or varieties that are not insurable, unless such evidence is not required by the Risk Management Agency (RMA).
4. Dates the producer and other growers in the area normally plant and harvest the crop.
5. Name, location of, and approximate distance to the place the crop will be sold or used by the producer.
6. For an irrigated practice, the water source, method of irrigation, and amount of water needed for an irrigated practice for the crop.
7. RMA may also request additional information.
